# Asphalt Batch Mix Plant

**VINAYAK**<sup>®</sup>  
CONSTRUCTION EQUIPMENTS

Asphalt is the material used mainly in the construction of roads, highways, etc. It is the mixture of various contents that are uniformly mixed to form a homogenous mixture. The asphalt batch mix plant we offer provides a great benefit in making is mixing process simple, easy and fast. We provide an extensive range of batch mix plant varying in their specifications and mixing capacity.

# Drum Mix Plant

We are leading industry to manufacture drum mix plant. This plant is extremely useful in road construction, parking area construction process. This drum mix plant is used to make asphalt, coated road stones that improve the quality of the roads. They are available in

various production capacity and size. The plants we offer give top performance and are fuel efficient. We provide them at the best price range compared to other dealers in the market.

# Hot Mix Plant

Asphalt concrete is the mixture of asphalt, sand, stone aggregates and other filler material. After the ingredients are mixed they are heated in special plants called Hot Mix Plant. The hot mix plant is provided into both batch type and drum type for continuous processing. The plant is made from top materials that can handle the high temperature of the mixture and perform the process efficiently. We even customize the plants as per the need of the client.

# Asphalt Plant

To prepare the asphalt concrete, various materials like asphalt, stone aggregates, etc are mixed and heated together until they form a uniform mixture. The asphalt plant we offer have great temperature bearing capacity. These plants are offered in various dimensions and specifications to suit the production need of the plant.

# Asphalt Batch Plant

The asphalt batch plant is considered an ideal equipment in manufacturing the asphalt concrete. The plant we offer does not have any extra maintenance cost. The batch type of asphalt plant is offered in different capacity

of production i.e. from 80 to 160 TPH. We present the asphalt batch plant in various size and configuration that meet the customers need and even keep the price of the plant at an economic range.

The asphalt batch mix plant we manufacture is presented at the best price range and is offered at the best deal price to the clients. We not only serve the clients in India but even provide our machine and equipments in all the countries of the world.
